EMERGENCY PLAN OF ACTION

1. Time the seizure.
2. Ease the student to the floor, remove hazards in the area, and turn student onto his/her side to keep airway open.
3. Use vagus nerve stimulator (VNS) and/or rectal Diastat as indicated.
4. Call EMS 911: if Diastat is administered, or if **any** seizure lasts longer than five minutes; if there is any continued, progressive respiratory distress; if another seizure starts right after the first; if school has no record of student history of seizures, and/or if this PCP form indicates in writing to call at onset of seizure.
5. However, if Diastat is administered and a nurse is available in the building to monitor the stable student, the nurse may observe the student until parent/guardian arrives. If unable to reach parent/guardian within 30 minutes of administering Diastat and/or parent/guardian are unable to get to the school within one hour of administering Diastat, EMS 911 will be called.
6. Notify school personnel trained in CPR/first aid to respond and initiate CPR if needed prior to EMS arrival.
7. Notify parent/guardian.
8. If EMS is called the student must be transported via EMS to emergency facility, or parent/guardian must sign release with EMS and then parent/guardian assumes responsibility for student. The student may not return to school that day.
9. When student is transported via EMS, JCPS staff must ride with student unless parent and/or emergency contact accompanies them.
10. Document all seizure activity on the JCPS Health Services Log.
11. If the student requires medical treatment while on the bus, the driver will contact EMS.
